RefreshableController (interface)

refresh()	void

NameHistoryController

field/method	type
tableOfNames	TableView<ArrayList<Tag>>
tableOfTags	TableView<Tag>
Names	TableColumn<ArrayList<Tag>, String>
Tags	TableColumn<Tag, String>
selectedImage	ImageFile
initData(ImageFile)	void
refresh()	void
Cancel()	void
ApplyToNow()	void

GeneralTagsController

field/method	type
allTagTable	TableView<Tag>
allTags	TableColumn<Tag, String>
inputField	TextField
addTag()	void
cancel()	void
deleteTag()	void
viewFiles()	void
initialize(URL, ResourceBundle)	void
refresh()	void

MenuController

field/method	type
tableOfFolders	TableView<Folder>
folderNames	TableColumn<Folder, String>
FileTable	TableView<ImageFile>
NameColumn	TableColumn<ImageFile, String>
imagePath	Text
imgDisplay	ImageView
currentFolder	Folder
onlyImage	boolean
openTagMenu()	void
goParent()	void
openNameHistory()	void
openMoveToStage()	void
openFolder()	void
showLogStage()	void
ShowAllImages()	void
initialize(URL, ResourceBundle)	void
reStart()	void
refresh()	void

TagMenuController

field/method	type
imageTagTable	TableView<Tag>
allTagTable	TableView<Tag>
TagsOfTheImage	TableColumn<Tag, String>
AllAvailableTags	TableColumn<Tag, String>
tagNameIn	TextField
selectedImage	ImageFile
parent	MenuController
AddTag()	void
initData(ImageFile, MenuController)	void
refresh()	void
DeleteTag()	void
DeleteTagFromAll()	void
Back()	void
goFilesWithTag()	void
initialize(URL, ResourceBundle)	void

MoveFileController

field/method	type
tableOfFolder	TableView<Folder>
listOfFolder	TableColumn<Folder, String>
currentFolder	Folder
parent	MenuController
selectedFile	ArrayList<ImageFile>
stage	Stage
initData(ImageFile, MenuController, Stage)	void
initData(ArrayList<ImageFile>, Stage)	void
cancel()	void
open()	void
goParent()	void
move()	void
initialize(URL, ResourceBundle)	void
refresh()	void

FilesWithTheTagController

field/method	type
selectedTag	Tag
stage	Stage
parent	RefreshableController
TableOfImages	TableView<ImageFile>
ColumnOfImages	TableColumn<ImageFile, String>
ImageDisplay	ImageView
imagePath	Text
initData(Tag, Stage, RefreshableController)	void
goBack()	void
copyFilesWithTag()	void

DeleteConfirmController

field/method	type
tagToDelete	Tag
stage	Stage
parent	RefreshableController
initData(Tag, Stage, RefreshableController)	void
confirm()	void
reject()	void

StartSceneController

field/method	type
PathField	TextField
startButton	Button
OpenDirectoryChooser()	void
goMenu()	void
initialize(URL, ResourceBundle)	void

logDisplayController

field/method	type
displayArea	TextArea
initialize(URL, ResourceBundle)	void
